

CASE STUDY

REAL-TIME EMERGENCY RESPONSE SYSTEM

Hospital alert platform with sub-200ms notification latency across 5+ units.

Category: fullstack

Tech: JavaScript, Firebase Realtime DB, Cloud Sync, Dashboard

SYSTEM OVERVIEW

HOSPITAL ALERT PLATFORM

A real-time alerting platform for hospitals with a dual-sync Firebase + local database architecture.

* Latency: < 200ms

* Uptime: 99.9%

* Units: 5+

CASE STUDY

REAL-TIME EMERGENCY RESPONSE SYSTEM

Hospital alert platform with sub-200ms notification latency across 5+ units.

Tech: JavaScript, Firebase Realtime DB, Cloud Sync, Dashboard

RESILIENCE & DASHBOARD

ZERO DATA LOSS SYNC

Live streams synchronize between cloud and local databases even during network degradation.

- Centralized dashboard for live resource tracking.
- Emergency response allocation in real time.
- Dual-sync guarantees zero data loss.
